

Remote Workers ?

Communications made simple !

www.quellsystems.com

Most companies will be only to aware of the need for efficient and effective communications, whether between your own staff located in different offices, staff on the move or with associated companies so necessary in the many and diverse aspects of logistics.

The advent of the Internet now makes this simpler and less expensive process but choosing and installing the correct services and products can be difficult.

ISP/ADSL
Firewalls
Servers
VPN's

Quell Systems will discuss your exact needs with you and offer a bespoke package designed exactly to meet your requirements, enabling effective and secure access for your users to services and facilities regardless of whether they are in the Head Office or in a Hotel on the other side of the world.

Reduce Costs • Reduce Delays
Increase Efficiency • Increase Security

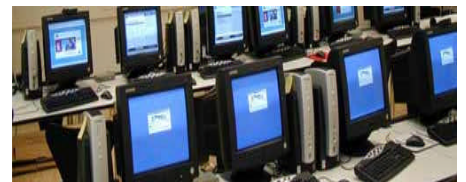

ISP/ADSL - A fixed, permanent high capacity link between your office and the Internet:

- Fixed annual rental
- Speeds which make it practical for Web Site access – Significantly enhancing the online experience.
- Delivered to the end user using BT's existing Network.
- 10 – 40 times faster than typical modems.

Firewalls – A hardware device or software on your server to restrict access and protect your systems and data from unwelcome intrusion. Vital with a permanent connection to the Internet.

Server – You will need a server to provide a gateway for your mail.

V.P.N. – Virtual Private Network is an inexpensive way of enabling remote users communicating with your system in a secure manner
